Electronics—Physical Principles and Applications 372
Faster than Thought 86
Fields and Waves in Modern Radio 374
Fluorescence Analysis in Ultra-Violet Light 510
Four-Place Tables of Transcendental Functions 221
Fundamentals of Electronic Motion, The 280
Guide to Audio Reproduction 221
Faster Than Thought 86
High Voltage Laboratory Technique 373
Industrial Electronic Engineering 327
Industrial Electronics 372
Industry and Science 461
Instrument Manual, The 40
Insulation of Electrical Equipment, The 418
Introduction to Ultra-High-Frequency Radio Engineering .. 221
Introduction to Valves 85
Introductory Circuit Theory 461
Kempe's Engineers' Year Book, 1954 174
Laplace Transforms for Electrical Engineers 510
Low-Frequency Amplification 281
Magnetic Amplifier 129
Magnetic Amplifiers 40
Magnetic Amplifiers and Saturable Reactors 418
Mechanism of Economic Systems, The 418
Methods of Theoretical Physics 175
Microwave Lenses 176
Microwave Spectroscopy 327
Modern Electroplating 417
Nuclear Physics 41
Optical Workshop Principles 328
Oscilloscope at Work, The 510
Physics and Applications of Secondary Emission 462
Physics of Experimental Method 418
Power System Transients 557
Practical Electrician's Pocket Book 1955, The 129, 558
Practical Television Circuits 557
Present State of Physics, The 556
Principles and Practice of Radar 175
Principles of Electronics 128
Principles of Physical Optics 462
Principles of Mass and Flow Production 509
Principles of Transistor Circuits 326
Probability and Information Theory, with Applications to Radar 176
Proceedings of the National Electronic Conference, 1953 510
Progress in Nuclear Physics, Volume 3 374
Radioactivity and Radioactive Substances 86
Radio Engineering 41, 129
Radio Receiver Design 280
Relays for Electronic and Industrial Control 460
Rocker Propulsion 462
Rotating Amplifiers 372
Rutherford, By Those Who Knew Him 509
Servo Mechanisms 328
Simultaneous Linear Equations and The Determination of Eigenvalues 281
Small Transformers and Inductors 84
Soft Magnetic Materials for Telecommunications 176
Static Electrification 327
Statistical Methods of Electrical Engineering 327
Technical Aspects of Sound 84
Technique de la Television 176
Television Antennas and Converters 175
Television Engineers' Pocket Book 557
Television Engineering Principles and Practice 85
Television Receiver Servicing 508
Text Book of Radar, A 557
Thermionic Valves, Their Theory and Design 416
Transistoren-Wirkungsweise, Eigenschaften und Anwendungen (Transistors-Mode of Action, Properties and Applications) 558
Vacuum Tube Oscillators 128
Vector and Tensor Analysis 510
Wireless and Electrical Trader Year Book, 1954 328
Year that made the Day, The 129

C

Capacitors, The Zinc Coating of Paper for, by Vacuum Evaporation, by L. Holland and K. Hacking .. 296
Charges and Currents, Induced, by W. E. Benham .. 366
Circuits and Logic, More about, by T. L. Craven .. 302
Clipper with Automatic Mark-Space Ratio Control, by A. B. Johnson 364
